Renaissance Woman Ramie Targoff,2018-04-17 A biography of Vittoria Colonna, confidante of Michelangelo, scion of one of the most powerful families of her era, and a pivotal figure in the Italian Renaissance Ramie Targoff's Renaissance Woman tells of the most remarkable woman of the Italian Renaissance: Vittoria Colonna, Marchesa of Pescara. Vittoria has long been celebrated by scholars of Michelangelo as the artist's best friend—the two of them exchanged beautiful letters, poems, and works of art that bear witness to their intimacy—but she also had close ties to Charles V, Pope Clement VII and Pope Paul III, Pietro Bembo, Baldassare Castiglione, Pietro Aretino, Queen Marguerite de Navarre, Reginald Pole, and Isabella d'Este, among others. Vittoria was the scion of an immensely powerful family in Rome during that city's most explosively creative era. Art and literature flourished, but political and religious life were under terrific strain. Personally involved with nearly every major development of this period—through both her marriage and her own talents—Vittoria was not only a critical political actor and negotiator but also the first woman to publish a book of poems in Italy, an event that launched a revolution for Italian women's writing. Vittoria was, in short, at the very heart of what we celebrate when we think about sixteenth-century Italy; through her story the Renaissance comes to life anew.

Regenerative Medicine Applications in Organ Transplantation Giuseppe Orlando,2013-10-11 *Regenerative Medicine Applications in Organ Transplantation* illustrates exactly how these two fields are coming together and can benefit one

another. It discusses technologies being developed, methods being implemented, and which of these are the most promising. The text encompasses tissue engineering, biomaterial sciences, stem cell biology, and developmental biology, all from a transplant perspective. Organ systems considered include liver, renal, intestinal, pancreatic, and more. Leaders from both fields have contributed chapters, clearly illustrating that regenerative medicine and solid organ transplantation speak the same language and that both aim for similar medical outcomes. The overall theme of the book is to provide insight into the synergy between organ transplantation and regenerative medicine. Recent groundbreaking achievements in regenerative medicine have received unprecedented coverage by the media, fueling interest and enthusiasm in transplant clinicians and researchers. Regenerative medicine is changing the premise of solid organ transplantation, requiring transplantation investigators to become familiar with regenerative medicine investigations that can be extremely relevant to their work. Similarly, regenerative medicine investigators need to be aware of the needs of the transplant field to bring these two fields together for greater results. Bridges the gap between regenerative medicine and solid organ transplantation and highlights reasons for collaboration Explains the importance and future potential of regenerative medicine to the transplant community Illustrates to regenerative medicine investigators the needs of the transplant discipline to drive and guide investigations in the most promising directions

Thyroid Autoimmunity A. Pinchera,2012-12-06 In 1956, three groups independently reported evidence that some thyroid disease appearing spontaneously in humans or experimentally induced in animals are related to autoimmune processes. The interval between these landmark discoveries and the present has witnessed a remarkable and continuing growth of both knowledge and concepts concerning the mechanisms of immune regulation, the pathogenesis of autoimmune thyroid diseases, and their clinical and laboratory manifestations. More importantly knowledge of thyroid autoimmunity has, in many respects, comprised the vanguard of an ever increasing appreciation and understanding of autoimmune diseases in general. On November 24-26 1986, an International Symposium on Thyroid Autoimmunity was held in Pisa. Its purpose was to commemorate the birth of thyroid autoimmunity as a scientific discipline, to summarize current knowledge and concepts in this area, and where possible, to anticipate areas of opportunity for the future - hence the theme of the Symposium, Memories and Perspectives. To open the meeting, the Magnifico Rettore (Chancellor) of the University of Pisa granted special Awards to Dr. Deborah Doniach, Dr. Ivan Roitt, and Dr. Noel R. Rose, who published the first fundamental studies in the field of thyroid autoimmunity, and to Dr. Duncan G. Adams, whose discovery of the long-acting thyroid stimulator (LATS) opened the door to our current understanding of the pathogenesis of Graves' disease. During the meeting thirty plenary lectures were presented.

The Written Gospel Markus Bockmuehl, Donald A. Hagner, 2005-07-28 This book comprehensively surveys the origin, production and reception of the canonical gospels in the early church. The discussion unfolds in three steps. Part One traces the origin of the 'gospel' of Jesus, its significance in Jewish and Hellenistic contexts of the first century, and its development from eyewitness memory to oral tradition and written text. Part Two then more specifically examines the composition, design and intentions of each of the four canonical gospels. Widening the focus, Part Three first asks about gospel-writing as viewed from the perspective of ancient Jews and pagans before turning to the question of reception history in the proliferation of 'apocryphal' gospels, in the formation of the canon, and in the beginnings of a gospel commentary tradition.

The Keratinocyte Handbook, 1994 Keratinocytes, as the main cellular component of the organism/environment interface, perform a vast range of functions in protection, secretion, sensation and self-repair by virtue of their great plasticity in form and development. Indeed recent medical advances in laboratory culture of these cells for use as skin grafts in cases of severe burns or ulceration owe much of their success to this very plasticity. Drawing upon a wide range of international expertise the various interconnected aspects of cell structure, composition and function are laid out in this volume, providing a comprehensive dossier of the keratinocyte and its biological significance.--Pub. desc.

Stem Cells and Regenerative Medicine Walter C. Low, Catherine M. Verfaillie, 2008 The commercialization of biotechnology has resulted in an intensive search for new biological resources for the purposes of increasing food productivity, medicinal applications, energy production, and various other applications. Although biotechnology has produced many benefits for humanity, the exploitation of the planet's natural resources has also resulted in some undesirable consequences such as diminished species biodiversity, climate change, environmental contamination, and intellectual property right and patent concerns. This book discusses the role of biological, ecological, environmental, ethical, and economic issues in the interaction between biotechnology and biodiversity, using different contexts. No other book has discussed all of these issues in a comprehensive manner. Of special interest is their impact when biotechnology is shared between developed and developing countries, and the lack of recognition of the rights of indigenous populations and

traditional farmers in developing countries by large multinational corporations.

The Binder of Lost Stories Cristina Caboni, 2020 With her delicate touch, Sofia Bauer restores books to their original splendor. In this art she finds refuge from her crumbling marriage and the feeling that her once-vibrant life is slipping away. Then an antique German edition takes her breath away. Slipped covertly into the endpapers is an intriguing missive, the first part of a secret...from one bookbinder to another. Two hundred years ago, Clarice von Harmel defied the constraints of family and society to engage in a profession forbidden to women. Within three separate volumes, Clarice bound her own hidden story filled with pain, longing, and love beyond all reason. A confession that now crosses centuries to touch the heart of a stranger.
