The Voyages and Adventures of Captain Hatteras Jules Verne,2020-10-25 The Adventures of Captain Hatteras (French: Voyages et aventures du capitaine Hatteras) is an adventure novel by Jules Verne in two parts: The English at the North Pole (French: Les Anglais au pôle nord) and The desert of ice (French: Le Désert de glace). The novel was published for the first time in 1864. The definitive version from 1866 was included into Voyages Extraordinaires series (The Extraordinary Voyages). Three of Verne's books from 1863-65 (Five Weeks in a Balloon, Journey to the Center of the Earth, and From the Earth to the Moon) were added into the series retroactively. Captain Hatteras shows many similarities with British explorer John Franklin. The novel, set in 1861, described adventures of British expedition led by Captain John Hatteras to the North Pole. Hatteras is convinced that the sea around the pole is not frozen and his obsession is to reach the place no matter what. Mutiny by the crew results in destruction of their ship but Hatteras, with a few men, continues on the expedition. On the shore of the island of New America he discovers the remains of a ship used by the previous expedition from the United States. Doctor Clawbonny recalls in mind the plan of the real Ice palace, constructed completely from ice in Russia in 1740 to build a snow-house, where they should spend a winter. The travellers winter on the island and survive mainly due to the ingenuity of Doctor Clawbonny (who is able to make fire with an ice lens, make bullets from frozen mercury and repel attacks by polar bears with remotely controlled explosions of black powder). When the winter ends the sea becomes ice-free. The travellers build a boat from the shipwreck and head towards the pole. Here they discover an island, an active volcano, and name it after Hatteras. With difficulty a fjord is found and the group get ashore. After three hours climbing they reach the mouth of the volcano. The exact location of the pole is in the crater and Hatteras jumps into it. As the sequence was originally written, Hatteras perishes in the crater; Verne's editor, Jules Hetzel, suggested or rather required that Verne do a rewrite so that Hatteras survives but is driven insane by the intensity of the experience, and after return to England he is put into an asylum for the insane. Losing his soul in the cavern of the North Pole, Hatteras never speaks another word. He spends the remainder of his days walking the streets surrounding the asylum with his faithful dog Duke. While mute and deaf to the world, Hatteras' walks are not without a direction. As

indicated by the last line Captain Hatteras forever marches northward. (wikipedia.org)

The Voyages And Adventures Of Captain Hatteras (Illustrated) Jules Verne,2014-03-29 To-morrow, at the turn of the tide, the brig Forward, K. Z., captain, Richard Shandon, mate, will clear from New Prince's Docks; destination unknown. This announcement appeared in the Liverpool Herald of April 5, 1860. The sailing of a brig is not a matter of great importance for the chief commercial city of England. Who would take notice of it in so great a throng of ships of all sizes and of every country, that dry-docks covering two leagues scarcely contain them? Nevertheless, from early morning on the 6th of April, a large crowd collected on the quays of the New Prince's Docks; all the sailors of the place seemed to have assembled there. The workmen of the neighboring wharves had abandoned their tasks, tradesmen had left their gloomy shops, and the merchants their empty warehouses. The many-colored omnibuses which pass outside of the docks were discharging, every minute, their load of sight-seers; the whole city seemed to care for nothing except watching the departure of the Forward. The Forward was a vessel of one hundred and seventy tons, rigged as a brig, and carrying a screw and a steam-engine of one hundred and twenty horse-power. One would have very easily confounded it with the other brigs in the harbor. But if it presented no especial difference to the eye of the public, yet those who were familiar with ships noticed certain peculiarities which could not escape a sailor's keen glance.
